

# MYTH OR FACTS

## ABOUT CYBERSECURITY

◆ CYBER SECURITY AWARENESS MONTH 2026 ◆

### ✗ MYTH AI AT WORK

Public AI chatbots are safe to use with customer or bank data.

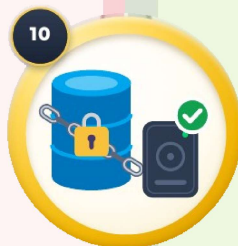

### ✓ FACT

What you type may be stored and seen by others. Never enter customer or bank data into public AI tools. Use only AI tools approved by your bank.

### ✗ MYTH RANSOMWARE

We have backups, so ransomware can't really hurt us.

### ✓ FACT

Ransomware hunts for connected backups and locks them too. Keep at least one copy offline or immutable (unchangeable), and test restoring it regularly.

### ✗ MYTH REPORTING FRAUD

Once money is lost to online fraud, reporting it is pointless.

### ✓ FACT

Act within the 'golden hour'. Report at once on 1930 or [cybercrime.gov.in](https://cybercrime.gov.in). Quick reporting helps freeze the money before fraudsters can withdraw it.

### STOP • THINK • TAKE ACTION

Never share OTP, PIN or passwords

Verify callers on a known number

Use only official app stores

Report fraud at once on 1930
